

Teddy Siatita

Chief Enterprise Architect (CEA)
Office of Chemical Safety and Prevention Pollution (OCSPP)
U.S. Environmental Protection Agency

Mr. Teddy Siatita, a U.S. Army veteran that served within the Special Operations community. He comes from a military family and continues to serve as a federal civilian employee. IN 2018, he joined U.S. EPA Office of Chemical Safety and Pollution Prevention (OCSPP) as its first Chief Enterprise Architect. He has 25+ years of experience primarily driving digital service solutions and governance with a strong commitment to U.S. EPA's mission and the delivery of reliable services to customers and stakeholders. He is one of the principal leads for OCSPP's Digital Transformation initiative which is to enhance service delivery and user experience. As OCSPP's Chief Enterprise Architect, he also envisions and sets technical strategies for how emergent technology will be aligned and implement cost effective new technologies. Prior to U.S. EPA, he served at USDA Foreign Agricultural Service as its Chief Architect. He also held positions at the U.S. Dept. of Transportation and Dept. of Defense. He is currently pursuing a Master of Science in Data Science and holds several certifications in information technology, project management, and acquisition management.
