

Dr. Anjuli S. Bamzai is currently Senior Science Advisor, Global Climate Change in the Geosciences directorate at the U.S. National Science Foundation (NSF). Over the course of her career spanning NOAA, DOE Office of Science and NSF, she has provided scientific oversight and management of projects in climate studies, including observational field campaigns, modeling and simulation. She has also engaged in strategic envisioning of coordinated efforts in climate and Earth Systems Science through participation in interagency Working Groups *e.g.*, U.S. Climate Variability and Predictability program, Interagency Council for Advancing

Meteorological Services Committee for Research and Innovation and Interagency Group on Integrative Modeling at the U.S. Global Change Research Program.

Dr. Bamzai holds an undergraduate degree in Physics from Fergusson College, Pune India and doctoral degrees in Theoretical Chemistry from Indian Institute of Technology Bombay India, and in Earth Systems and Global Change from George Mason University U.S.A.
