Mangala Kuppa is a seasoned professional with over 25 years of experience in both the public and private sectors. She is a go-getter with a unique skill set that includes in-depth technical expertise, experience with industry best practices, and exceptional leadership and management skills. As Chief Technology Officer within the Department of Labor's Office of the Chief Information Officer, she serves as a key advisor to the Chief Information Officer and Deputy Chief Information Officers on the development of short and long-range IT plans for all elements of the enterprise-wide technology environment. This includes providing technology leadership, advice, and guidance throughout the department in planning for implementation of all new or upgraded IT services in a managed architecture program. Mangala also serves as the Director of Technology, Innovation and Engineering, responsible for overseeing the development and operations of the department's Enterprise Data Platform and Artificial Intelligence and Machine Language strategies and policies. Mangala previously served as the Director of the Directorate of Business Applications Services, where she oversaw the operation, maintenance, and modernization of the department's mission and business-focused systems.
