

Kelly Moan serves as the Chief Information Security Officer (CISO) for the New York Police Department (NYPD). In this role, Ms. Moan leads the Information Security team to protect, defend, and strengthen the security posture of the NYPD against cyber threats. Throughout her career, Ms. Moan has taken a holistic and mission driven approach to cybersecurity.

Prior to joining the NYPD, Ms. Moan was the Division Chief of Enterprise Engineering for the Department of Homeland Security (DHS) in Washington, DC. Her portfolio included security, network, and systems. She led the security architecture and engineering team, building and deploying emerging technology to enhance cybersecurity defenses for the Department.

During her time at DHS, she served as the FedRAMP Joint Authorization Board (JAB) Technical Representative to the CIO, providing subject matter expertise on securing cloud technologies for use by the federal government. She also was the Intelligence and Operations Briefer for the Secretary of Homeland Security. At other points in her career, Ms. Moan held roles in the private sector supporting the DoD and US-CERT.

Ms. Moan holds an undergraduate degree from American University and a graduate degree from Pennsylvania State University.
