David Larrimore
CHIEF TECHNOLOGY OFFICER
Chief Technology Officer Directorate

David Larrimore serves as the Chief Technology Officer Directorate for the DHS Office of the Chief Information Officer (OCIO).

As CTO, Mr. Larrimore leads DHS network modernization and aligns technology solutions with mission needs to optimize the Department's ability to protect the homeland. He guides strategic digital and technological innovation, manages assets, and analyzes key information technology practices.

Prior to joining OCIO, Mr. Larrimore served as a Lead Solutions Engineer in the Global Public Sector business unit of Salesforce, Inc., where he used design thinking to re-invent how Solution Engineers build, tailor, and deploy assets to be shared by every role in the organization.

Mr. Larrimore also served as the Chief Technology Officer for Immigration and Customs Enforcement (ICE). In that role, his team led the effort to deploy the organization's first multi-cloud environment, providing not only transparency and cost savings, but doubled project teams speed to deliver mission value.

Prior to his time at ICE, Mr. Larrimore served as a Cloud Strategist, where he helped bring cloud technology to the Department of Agriculture and built the first Enterprise Data Warehouse for the General Services Administration.

Mr. Larrimore has over a decade of experience in federal IT and has dedicated his professional career to leveraging technology to build and transform organizations.

Mr. Larrimore earned his Bachelor of Arts in visual communication from Salisbury University.
