

Rajesh Vasisht
Director of Cloud Artificial Intelligence and Machine Learning
CGI Federal

Rajesh Vasisht is a Director of Cloud Artificial Intelligence and Machine Learning at CGI, providing technical consulting expertise that enables federal agencies to leverage data, machine learning, artificial intelligence, and cloud-based solutions to achieve breakthrough results. By applying the latest technologies to advance the use of clients' data as a strategic asset, he enables his clients to make more effective, efficient, and proactive decisions. With a deep background in middleware integration, he helps his clients reduce complexity and optimize business functionality for measurable mission results. Rajesh's colleagues and clients value his focus on mission understanding first as he works to understand business needs and goals, then deliver technical solutions that meet current and future needs.

Rajesh's passion for technology inspires him to advance his skills continuously, exploring new technology offerings and achieving multiple certifications including AWS Certified Solutions Architect, Certified Developer, Certified SysOps Administrator, and Machine Learning Specialty. A Virginia Tech Hokie, he holds a Bachelor of Science in Mechanical Engineering.
