

Keith Bocian

Senior Data Scientist

@ Office of the Inspector General, Department of Health and Human Services

Areas of Expertise:

- Leading Technology Projects Involving Data Science
- Robotic Process Automation
- Cloud-Based Data Science Solutions

Keith Bocian is HHS-OIG's first Senior Data Scientist. In this role, he helps to ensure AI and ML-related projects are aligned to organizational business requirements as well as with departmental and federal AI strategies. He also leads a team of automation, data engineering and data science professionals to build NLP and automation solutions understandable by end users who do not have a background in analytics.

Keith has earned a bachelor's degree in data science from Montana Technological University, a bachelor's in geological sciences from Brown University, a master's in business administration from Georgetown University, and certifications in a variety of cloud platforms including AWS and Azure. In his spare time, Keith is a violinist.
